Installation Guide

1

Insert the silicon cord into the hard tube
Use the heat gun to heat the bend point

2

Press against the tube forcing
the tube to fit the shape
(or angle) of the mandrel

3

Mark the tube you would like to cut it

4

Place the tube between the cutting
wheel and tow rollers
Make sure the cutting wheel is in
contact with the tube

5

Rotate the knob to adjust
the cutting wheel
Rotate the cutter around the tube

6

Use the reamer to remove burrs
